

WHEREAS, notwithstanding her good intentions, the Division's investigation concluded

that Cambridge and Brown engaged in acts or practices constituting violations of the Act and

that the Administrative Complaint detailing its findings and

### III. CONCLUSION

The proposed algorithm can be used to estimate the parameters of a system with a time-varying input.

Department of Electrical and Electronic Engineering, The University of Hong Kong, Pokfulam, Hong Kong, P. R. China.

Y. H. Wang received the B.Sc. degree in electrical engineering from the University of Hong Kong, Hong Kong, P. R. China, in 1982, and the M.Sc. degree in electrical engineering from the University of Hong Kong, Hong Kong, P. R. China, in 1984. He received the Ph.D. degree in electrical engineering from the University of Hong Kong, Hong Kong, P. R. China, in 1987. He is currently an Associate Professor in the Department of Electrical and Electronic Engineering, The University of Hong Kong, Hong Kong, P. R. China. His research interests are in the areas of adaptive control, nonlinear control, and system identification.

Manuscript received July 1, 1994; revised manuscript received August 1, 1994.
